important: before protective treatment: the floor must be perfectly stripped, thoroughly rinsed and completely dry!

Let dry protection treatment completely between the layers and before use

Process treatement of protection: see descriptione of method

For initial cleaning with maintenance cleaner after protective treatment, see "initial cleaning".

^{*} basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / P: polishing / S: structured / V: heavily soiled

Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.

For security information, see the safety data sheet at www.wetrok.ch.

Wear protection: gloves, safety goggles, work clothes

Follow the information and remarks on the label, product data sheet and material safety data sheet.

The product data sheet describes the product and gives information about its application, storage. See www.wetrok.ch

The recommended colours of pad and brushes consist to the actual wWetrok product range

Follow the special cleaning and care instructions of the floor manufacturer

The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

PVC floor coverings are sensitive to certain solvents such as ketone, ester and chlorinated hydrocarbon.

PVC floor coverings are sensitive to cigarette burns, glowing cigarettes and deposit marks.

PVC floor coverings are very resistant to strong alkalines and acids.

Fat-soluble colorants such as shoe polish or asphalt can penetrate into PVC floor coverings: diffusion

PVC is a synthetic covering made from polyvinylchloride (PVC), softeners, fillers and colour pigments.

Homogeneous PVC floor coverings consist of one or more layers with the same composition.

Polyurethane surfaces are insensitive to cigarette burns, glowing cigarettes and deposit marks.

Distinguishing feature: fire assay with a glowing hot needle in an inconspicuous place: the needle penetrates, acrid smell, crater cannot be removed with fingers.

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.

Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.

Test on an inconspicuous spot to find which product is suitable for your requirements.

Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.

Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
