* basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / P: polishing / S: structured / V: heavily soiled

important:

change pad often
green and black pad on hard stone only
Use a coin or a key to do a scratch test, to check if all the protective coating has been removed.
When white abrasion occurs, carry out a full clean to remove all the protective coating
For initial cleaning after basic cleaning, see "initial cleaning".

coating						
2	 impregnation	Imprasol	100%	Cover for Florfix Flat mop/	Florfix/ Drewell/ Buket plast 22l	If necessary, one layer on porous surface  

* basic treatment / structure: B: coated / C: waxed / D: oiled / E: sealed / F: untreated / G: maintenance care product / P: polishing / S: structured / V: heavily soiled

important: before protective treatment: the floor must be perfectly stripped, thoroughly rinsed and completely dry!
Let dry protection treatment completely between the layers and before use
do not coat impregnated floors
Process treatment of protection: see description of method
For initial cleaning with maintenance cleaner after protective treatment, see "initial cleaning".

General instructions for cleaning and care

no.27 Synthetic stone, polished, paving stones and Terrazzo

Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.
For security information, see the safety data sheet at www.wetrok.ch.
Wear protection: gloves, safety goggles, work clothes
Follow the information and remarks on the label, product data sheet and material safety data sheet.
The product data sheet describes the product and gives information about its application, storage. See www.wetrok.ch
The recommended colours of pad and brushes consist to the actual wWetrok product range
Follow the special cleaning and care instructions of the floor manufacturer
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

Strong acids can destroy cement-bound synthetic stone.
Cement-bound synthetic stone is sensitive to solvents.
Most grouts are acid sensitive. Soak the joints well before using acidic cleaners.

There must be no coating in the open air and in wet rooms. Danger of slipping!
There must be no coating in the open air and in wet rooms. Danger of slipping!

Synthetic stone is a blend of coloured stone chippings in cement or bound with a resin.
Cast stone is laid as finished slabs and terrazzo is poured and ground across the entire surface.

Distinguishing feature: cement-bound synthetic stone acid assay: apply a little basic sanitary cleaner to the magnesite covering. Foams up: material damage!

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.
Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.
Test on an inconspicuous spot to find which product is suitable for your requirements.
Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.
Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
