

Bonastre Pads

DIAMANT DISCS FOR OPENING AND LAND MAINTENANCE

The **Bonastre Pads** ecological polishing discs are ideal for mechanical surfaces without experience, so that anyone can achieve incredible results without risk of damaging or staining surfaces. The Bonastre Pads discs surprise for its economy, speed, results and ease of use. They have the advantage that the weather does not affect them, and it's cold, hot or raining. The results are always amazing. They have multiple applications and can be used with different types of equipment: low speed polishing, manual polisher and scrubber, all of them achieving incredible brightness using only water.

Characteristics

- » Available in any way.
- » Simple process, fewer steps and better results.
- » To clean and polish.
- » Spectacular lasting brightness.
- » Even non-slip glitter in wet.
- » It even eliminates stains of acids.
- » It does not hit the ground.
- » Only with water
- » Ease of use.
- » Eco friendly, without chemicals.
- » Ideal for daily maintenance with scrubber.
- » Low cost

Packaging and Marking

The discs come packaged individually and marked with their size, color, supplier and product name on the back.

Duration in marble floors and terrazzo

Rotary, glossy. 300 to 600 m2 under normal conditions of use.

Scrubber (daily maintenance). Large areas 100,000-150,000 m2 depending on maintenance.
From 1000 to 50,000 m2 In small or medium-sized areas between one and two months.

Duration in concrete floors or very poor condition

Depending on the state of the ground the duration could be half that in the floors of marble and terrazzo

Bonastre Pads

How to use it

The color part of the disk must be in contact with the ground.

If the soil is very rough, we recommend using PRO 1 and PRO 2 before using it to obtain a perfect result.

Use with rotary

Add water, pass the first red disc between 5 and 10 crossed passes, aspire and repeat the process with the second yellow disc, performing between 5 and 10 crossed passes, aspire and repeat with the green disc. The green disc is recommended to repeat the process between 2 and 3 times with clean water.

It is important to always work with clean water to get a better gloss, if you see that it is very dirty water, aspire and re-add clean water to continue with the process.

Use with a scrubber

In shiny applications make 10 to 15 passes with each disc.

For the maintenance of soils with intense traffic, such as supermarkets or shopping centers, we recommend keeping only the yellow disc, or alternating the yellow and green discs.

In less crowded places keep green. However, we recommend yellow for a more optimal result.

Soils where I can use Bonastre Pads

Floor	Deep cleaning	Polishing	Daily cleaning
Terrazzo			
Marble			
Granite with shine	X	X	X
Granite mat			
Mat Ceramic tiles	X	X	X
Polishing ceramic tiles	X	X	X
Vinyl/Plàstic/Linoleum/ PVC			
Epoxy/Acrylic			X
Concrete
