# Bonastre Pro

## User manual

In normal conditions, we will start with the PRO1 Roig and if there are deep scratches or acidic stains, we will start with the PRO 0 Black.

Add water and make a minimum of 3-4 crossed passes, aspire and repeat if necessary in each one of the PRO. If necessary, take more passes.

Repeat the process with the Pro 1 3 crossed passes, aspire and then do 3-4 passes with Pro 2. Then you have two options to polish the ground: Fast method with the Duo disc to make a quick glow or if you want to get a maximum polish to follow with the yellow and green Pad.

**For the maintenance of surfaces with high traffic** We recommend using Bonastre Duo.

With this disc it will maintain a high level of brightness without damaging or destroying the surface, being the most suitable for high traffic areas.

**By corners, steps or inaccessible areas** There is the Polibrill drill kit.

## floors where can I use Bonastre Pro?
