

# Bonastre Xtreme

The **Bonastre Xtreme** disc range differs from normal discs, basically due to its support in natural fiber and its formulation resistant to more extreme soil conditions.

There are 4 colors: Violet, Blue, Red and Duo.

**Violet Xtreme:** More abrasive than blue. not suitable for surfaces that then want to polish.

**Blue Xtreme** only for coarse compact ceramic floors. (It can reduce the roughness and facilitate its cleaning).

**Red Xtreme** thanks to its features is faster and more resistant

**Duo Xtreme** ideal to be used in floors where the normal Bonastre Duo can suffer from premature wear due to abrasive soil characteristics

## Characteristics

- » Available in any way
- » Simple process, fewer steps and better results
- » To clean and polish.
- » Spectacular lasting brightness.
- » Even non-slip glitter in wet.
- » It even eliminates stains of acids.
- » It does not hit the ground
- » Only with water
- » Ease of use
- » Eco friendly, without chemicals.
- » Ideal for daily maintenance with scrubber
- » Low cost

## Packaging and Marking

The discs come packaged individually and marked with their size, color, supplier and product name on the back.

## Duration in marble floors and terrazzo

Rotary, brightening 300 to 600 m<sup>2</sup> under normal conditions of use.

Scrubber (daily maintenance). Large surfaces 30,000-150,000 m<sup>2</sup> depending on the abrasion or porosity of the soil. From 1000 to 50,000 m<sup>2</sup>. In small or medium-sized areas between one and two months.

## Duration in concrete floors or very poor condition

Depending on the state of the ground the duration could be half that in the floors of marble and terrazzo.

# Bonastre Xtreme

## instructions

the **BLUE XTREME** disc is very abrasive indicated to be used occasionally, to clean concrete floors and decapitate hard plastic floors, in marbles and terrazzo we do not recommend its use.

The **RED XTREME** disc thanks to its features is faster and more resistant than the Pad 1 Red disc, so we recommend its use in concrete, marble and terrazzo floors in poor condition, hydraulic mosaic etc.

**XTREME DUO** ideal to be used in floors where the normal Bonastre Duo can suffer from premature wear due to abrasive soil characteristics. Bonastre Duo Xtreme manages to obtain a longer disk length in more abrasive soil such as white marble, terrazzo with a lot of traffic, concrete floors or hydraulic mosaic.

### Soils where can I use Bonastre Xtreme?

Floor	Deep cleaning	Polishing	Daily cleaning
Terrazzo			
Marble			
Granite with shine	X	X	X
Granite mat			
Mat Ceramic tiles			
Polishing ceramic tiles	X	X	X
Vinyl/Plàstic/Linoleum/ PVC		Dry & Wet	Dry & Wet
Epoxy/Acrylic			X
Concrete		Dry & Wet
