**BONASTRE<sup>®</sup>  
DIAMONDS PADS**

**BONASTRE<sup>®</sup>  
DIAMONDS PADS**

**Directions**

Place the pad on your machine, with the color facing down.

For rough surfaces we recommend Bonastre PRO 1 and PRO 2 as a first step to achieve a perfect finish.

**Floor Machine**

Step 1, Red Pad. Add clean water to the surface. Do 5 to 10 passes, overlapping each pass. Vacuum the slurry. Repeat the process with the Yellow Pad, Step 2. Add clean water and do 5 to 10 passes, vacuum and continue to Step 3, with the Green Pad, adding clean water. Clean and repeat the last step 2 to 3 times until the desired gloss is achieved.

# STUNNING RESULTS USING AN AUTO SCRUBBER

Did you know you can use an auto scrubber for floor polishing? Use Bonastre Pads for daily cleaning and notice how easy it will be to maintain the gloss without any extra effort!

It's important to work with clean water all the time to be able to accomplish the best results. If during the process, the slurry gets too dirty, vacuum it and add clean water to continue with the process.

**Auto Scrubber**

For polishing, do 10 to 15 passes with each pad. For maintenance in high-traffic areas, like grocery stores or shopping malls, we recommend the use of the yellow pad or to alternate the daily cleaning with the green pad. For areas with less traffic, the yellow pad will be a good choice too.

**DESIGNED FOR  
DAILY USE WITH  
AUTO SCRUBBERS**

# BONASTRE<sup>®</sup> DUO

## One pad to polish & maintain with auto scrubbers

---

**Bonastre Duo** is a revolutionary pad, ideal for maintenance with auto scrubbers. Clean and maintain a high gloss finish surface, with one pad only.

If used on a daily basis, you'll be able to recover the shine even on high traffic areas. .

Save up to 30% of time than conventional pads. Less passes to obtain a high gloss. It can be used with auto scrubbers and high speed burnishers.

Protect the environment and your health. The Duo pad is odorless and free of chemicals. If used on a daily basis, the Duo pad is the perfect tool to use with your auto scrubber, and you won't need to repolish your surface with traditional processes ever again.

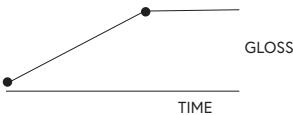

**Just add water.**

# **BONASTRE<sup>®</sup> DUO**

**Duo Xtreme** is ideal for those surfaces where Bonastre Duo Pad would get damaged too fast, like rough surfaces or areas with lippage.

# **BONASTRE<sup>®</sup> XTREME**

### Features

- » 50% faster than Bonastre Pads.
- » Higher gloss in fewer passes.
- » Available in any size\*.
- » Anti-slip finish, in wet or dry surfaces\*.
- » Won't scratch the surface\*.
- » Just add water.
- » Easy to use.
- » Eco-friendly, no need to use chemicals.
- » Ideal for daily use with an auto scrubber.

### Directions

For polished, and in good condition floors you can start using Bonastre Duo right away. In some cases, to be able to obtain a higher gloss, and save time, it's recommended to get the surface ready with Bonastre's Red Pad, and then continue with Bonastre Duo. When using a floor polisher, work with clean water. Remove the residue and add more water until the desire gloss is achieved .

Visible results with 20 to 30 passes.

- Option 1:** Fast process. Start with the Red pad to eliminate micro scratches to obtain a more intense gloss with the Bonastre Duo.
- Option 2:** Perfect finish. To obtain a "wet look" or "like a mirror" finish, use Bonastre Pro before the Bonastre Duo.

For vinyl or concrete floors, Bonastre Duo can be used dry, with high burnishing machines, to obtain a high gloss finish with a mechanical process.

Violet

# BONASTRE<sup>®</sup> XTREME

Blue

Bonastre Xtreme  
*Resistant pads for tough jobs*

Red

## Violet Xtreme

The most abrasive of the Xtreme pads line. Its ideal for deep stain removal in **concrete**.

Don't use it on areas that will be polished, since orange peel might show in some surfaces.

## Image 1 and 2

## Blue Xtreme

Abrasive pad to clean and grind scratches or stains. It could produce orange peel. (E.g. remove scratches from a **vinyl floor**, **image 3**)

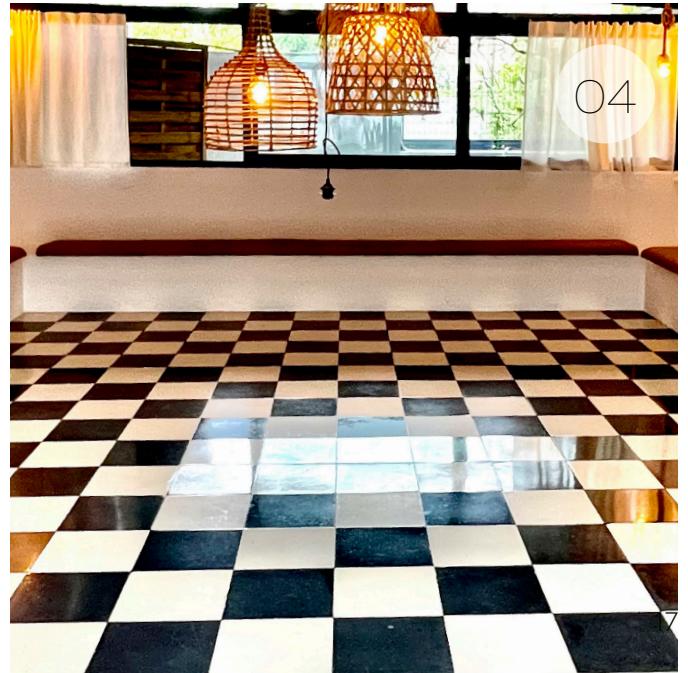

Yellow

## Red, Yellow and Red Xtreme

Similar to Bonastre Pads but designed for porous surfaces, like concrete or hydraulic floors. Thanks to its special fiber, they are more resistant for irregular surfaces.

**Image 4** hydraulic floor tiles

Green

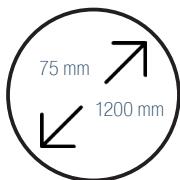

# BONASTRE<sup>®</sup> XTREME

## Features

- » Available in any size.
- » Restore and renew easily.
- » Achieve a "like a mirror" finish, and a anti-slip surface in dry or wet conditions.
- » Remove acid stains. Scratch free surface
- » Just add water.
- » Eco friendly, no chemicals needed.
- » Use with floor polisher or auto scrubber.

## How to use it

Note: Under normal conditions, start with Bonastre Pro 1 Red. If the surface has deep scratches or acid stains, start with Bonastre Pro 0 Black.

Pro 0. Black - add clean water and do at least 3 - 4 overlapping passes. Vacuum and repeat if the damage wasn't completely removed.

Pro 1 - add water and do 3 - 4 overlapping passes and vacuum.

Pro 2 - add water and do 3 - 4 overlapping passes and vacuum.

To obtain the highest gloss finish, continue with Yellow Pad, adding clean water, 7 to 8 passes, then vacuum. Repeat this step with Bonastre's Green Pad. Vacuum and replace clean water after 4 passes and continue. .

For high traffic areas, once the floor is restored, use Bonastre Duo to clean and polish with one pad only. With the Duo, you'll maintain the high gloss finish, without damaging or wear the surface making it ideal for high traffic areas.

For small areas, corners, stairs, or difficult to reach areas, use Bonastre's 5" Polibrill.

## BONASTRE PRO (Optional steps)

Steps PRO 0 BLACK, PRO 3 YELLOW and PRO 4 GRAY, are additional steps for when the most spectacular "like a mirror" finish is desired!

Bonastre Pro can also be used on granite and quartz but its important to finish the process with Novagranit Gel with a heavy machine. Professional use is recommended.

## ADDITIONAL DIAMOND RESINS

We have a wide variety of diamond resins.  
These are a few samples.

### SUPER MUNICH WITH BASE

Since 1993, the Munich Novatecs, have been one of the favorite tools preferred by professional stone care providers, thanks to the fast polishing results and for the high quality of the results.

### METAL BOND TREBOL 75 mm

Strong cutting power with a very fine scratch pattern. It can be used to grind marble and granite or to prepare the surface prior to applying coats or paint. It can be used dry or wet. Not recommended for satellite machines.

### FRANKFURT For floor polishers

### SATELITE DISC 100 mm/140 mm

### PVC PLATE

For abrasives with FVL,  
available in several sizes.

# Orbipad<sup>®</sup>

by Bonastre System

Clean floors, walls and furniture with water only

## *For any type of surface*

Bonastre's ORBIPAD line of melamine pads, are ideal to clean almost any type of surface, without scratching, using water. It's available in three different densities.

They can be used with or without equipment, to clean microporous surfaces, like ceramic or anti-slip stoneware tiles, painted epoxy floors, polished concrete, marble, plastic resins and thermoplastics, walls, plastic,

furniture, wood, etc.

Different sizes and shapes available for manual use, mops, corners, pads for floor polishers, auto-scrubbers, and orbital machines. Also as a hand-held sponges.

In most cases, adding water is all you need to clean with the Orbipads. It's a mechanical process without abrasion. In some cases, adding a degreaser soap can be used.

## CHOOSE THE BEST ORBIPAD FOR EACH SURFACE TYPE

### Orbipad Soft

- » Maximum cleaning power, it's the most flexible pad.
- » Better grip on uneven surfaces.
- » Less durable than the Orbipad Medium and Hard (not recommended for abrasive floors).
- » 100% compressed melamine.
- » Ideal for manual use, it requires less pressure.
- » For lightweight equipment on smooth flooring.
- » Pad must be wet before using.
- » Can be used with floor polishers and auto scrubbers. Always use Orbipad SP for orbital machines.

### Orbipad Medium

- » Orbipad's best seller due to it's perfect balance between cleaning power and durability.
- » Perfect combination of melamine sponge and polyurethane to reduce friction, ideal for plastic flooring.
- » Ideal for manual use on rough surfaces.
- » Lightweight or heavy equipment, on rough flooring.
- » Pad must be wet before using.
- » Use with floor machines or autoscrubbers, if using an orbital machine, use the Orbipad with an \*SP backing.

### Orbipad HARD

- » Most durable Orbipad available.
- » Perfect combination of melamine sponge and polyurethane to reduce friction, ideal for plastic flooring.
- » Ideal for manual use on rough surfaces or as a maintenance pad, using small amounts of water on the auto scrubber.
- » Lightweight or heavy equipment, on rough flooring.
- » Pad must be wet before using.
- » Use with floor machines or autoscrubbers, if using an orbital machine, use the Orbipad with an \*SP backing.

# Orbipad is a long lasting professional "eraser", available in any size

\*USE ORBIPAD SP (SPECIAL BACKING) PADS FOR ORBITAL EQUIPMENT

The Orbipad \*SP backing have a special fiber designed to support the orbital machines vibration. Any other Orbipad than the SP, used with an Orbital machine, will prematurely destroy the pad.

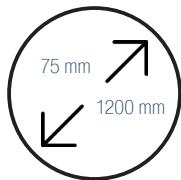

# Orbipad®

- » Maximum cleaning power, since it's the most flexible Orbipad
- » Orbipad's best seller due to its perfect balance between cleaning power and durability.
- » Most durable Orbipad available

## SIZE

Available in any size.

## PRODUCT INFO

Each pad includes product name, color, and batch number

## COVERAGE

From 50 to more than 4000 m<sup>2</sup> depending on floor type.

Must choose the appropriate Orbipad for the surface type.

## VIDEO

## EQUIPMENT

- » Auto-scrubber
- » Floor polisher
- » Orbital
- » Drill
- » Rotary

## BENEFITS

Clean different surface types easily.

Eco-friendly, no chemicals needed, just add water.

Won't scratch your surfaces.

Available in any shape and size (square, rectangle).

Orbipad will allow you to clean, in a very simple and efficient way, many types of surfaces, using an almost magical sponge-type product, leaving your surfaces surprisingly clean.

## IMPORTANT

If we use strong chemicals and/or abrasive pads on anti-slippery floors, type 2 or 3, they may lose or change its anti-slippery properties in a short to medium term.

Cleaning and scrubbing an anti-slippery surface, type 2 or 3, with Orbipads, won't change its properties and will maintain its anti-slippery characteristics.

## ANTI-SLIPPERY

Use Orbipads to clean anti-slippery floors, to avoid modifying its anti-slippery properties.

**Just add water**

## WHERE CAN ORBIPADS BE USED

SUPERFICIE	COMMERCIAL CLEANING	DEEP CLEANING	DAILY CLEANING
TERRAZZO/TERRAZO		X	X
MARBLE/MÁRMOL		X	X
POLISHED GRANITE/ GRANITO CON BRILLO		X	X
WOOD/MADERA/PARKET		X	X

POLISHED CERAMIC TILES/ PULIDO DE AZULEJOS CERÁMICOS			
VINYL/PLASTIC/LINOLEUM/ PVC		X	
EPOXY/ACRYLIC			
CONCRETE/HORMIGÓN		X	

### Properties

- » Available in different sizes.
- » Easy process, less steps, better results.
- » Won't scratch the surface.
- » Just add water.
- » User friendly, easy to use.
- » Eco-friendly product.
- » No need to add chemicals.

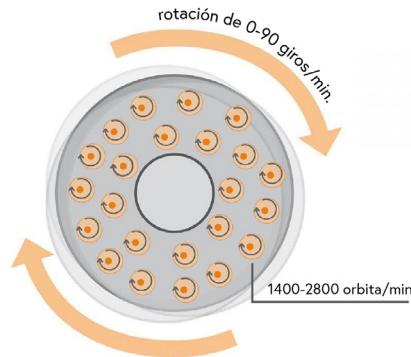

### How to use

Orbital melamine pads will clean dirt and grime from the top surface only, its not considered deep cleaning.  
 Use a floor polisher or an auto-scrubber.  
 Can be used by hand or with a mop holder.  
 Orbipads must be wet, never dry.  
 90% of the cases, adding water is all you need.  
 Avoid using chlorinated products, alcohol or strong solvents.

# Orbipad®

Combine Bonastre's Orbipads with roto-orbital technology to obtain the most spectacular results, with water only.

## TWO MOVEMENTS IN ONE

Two movements in one: roto-orbital.

Additional to the disc rotative natural motion, that goes from 0 to 90 rpm, the machine generates a constant orbit movement that allows to pass over the same area, many times at a high speed.

In hard surface areas, wood, epoxy floors, and carpet, it creates a rotative motion in an approximate 1 cm diameter, with 1400 o 2800 revolutions per minute, depending on the equipment model. This ensures an extraordinary performance and speed, in cleaning, sanding, polishing, crystallizing, etc.

The innovative orbital technology guarantees an easier job since the roto-orbital machine is easier to handle compared to classic floor machine. Making it easier for anyone to use it.

## ORBIPAD RT

RT - Recommended for deep cleaning, grinding.  
One or two speeds available, with a dry or wet sanding option, plus crystallizing.  
Dust vacuum kit available for sanding parquet

### Orbital motion

Orbital motion generates a constant orbit that allows your to go over the same area several times.

### Soft Orbisponge

- » Surprisingly cleaning power, less durability than the Medium Orbisponge .
- » Recommended to clean any type of smooth surfaces or objects, without effort.
- » Excellent product to clean any smooth surface "with water only".
- » Avoid using it on rough or abrasive surfaces
- » Avoid using it with chlorine or alcohol based cleaning products or strong solvents.
- » How to use: get the sponge wet and rinse after use.
- » Hand held use.

VIDEO

### Medium Orbisponge

- » Patented blend to provide a long lasting, best quality sponge.
- » Ideal to clean any surface, material or objects, smooth, abrasives or rough.
- » Since the density is harder, it will last longer than regular melamine, even on abrasive surfaces.
- » Avoid using it with chlorine or alcohol based cleaning products or strong solvents.
- » How to use: get the sponge wet and rinse after use.
- » Clean boats, pool tiles, etc.
- » Hand held use.

**Soft Orbimop**

- » The Soft Orbimops are ideal for professional use to clean any surface like stainless steel appliances and furniture, equipment, vehicles, plastic, wood, parquet, etc.
- » Ideal to clean corners, baseboards and edges, using only water. Avoid using the Soft Orbimop on rough or abrasive surfaces since it would cause premature wear.

VIDEO

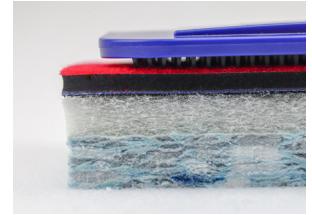

**Mop Support**

Use it to clean surfaces, smooth or abrasives, without having to bend over.

**Orbimop Foam Flex**

Extra Orbimop support, with velcro, to hold the pad in place, creating more grip.

**WHERE CAN ORBIMOP AND ORBISPONGE BE USED**

**Medium Orbimop**

- » Ideal to clean corners or any surface, either smooth or roug.
- » Patented blend to provide a long lasting, and amazin cleaning properties.
- » Avoid using melamine with chlorine or alcohol based cleaning products or strong solvents

## RANGE 6

RANGE 6 was designed to satisfied the needs of the professional cleaners. Our pads have a wider fiber structure that provides more abbrasion. The Range 6 pads are high durable and won't wear fast. You can reuse them if washed correctly after each use. Made with high-quality 100% polyester fibers, that offers elasticity and high durability. It's a must have product for the cleaning industry. Includes the 6 traditional pad colors.

## Fibratesco Range 6

*Wide variety of grits to choose from.*

***The white pad is the softest, the black the most abrasive one.***

**Bonastre System is the exclusive Range 6 distribuidor in Spain**

***Range 6 durability can last more than double than other brands.***

***Available in any size or shape  
Always in stock***

AVAILABLE OPTIONS FOR ORBITAL MACHINES

RECTANGLE SHAPE  
AVIALABLE

**WHITE FIBRATESCO**

Softest pad, for floor maintainace and finishing touches.

**RED FIBRATESCO**

For gentle cleaning.

**BLUE FIBRATESCO**

For deep, but gentle cleaning.

**GREEN FIBRATESCO**

For deep, but intermediate cleaning. (intermedio).

**BROWN FIBRATESCO**

For grinding or deep cleaning. Acid resistance.

**BLACK FIBRATESCO**

For grinding and deep cleaning. Acid resistance.

# Magic Renova

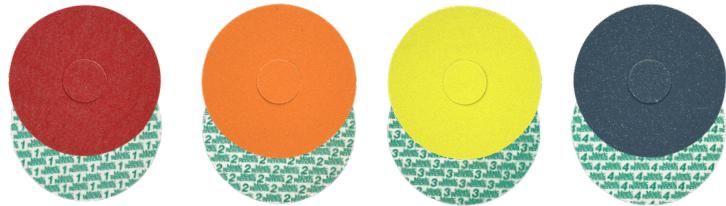

*Micro Pule y Abrillanta Sólo con Agua*

Easy small areas polishing and renew  
system, using water only

**Diamond abrasives, spectacular results.**

**Anyone can polish and renew stairs, countertops, walls, etc.**

VIDEO

Eliminate superficial acid stains and scratches.

Bring your surfaces shine back, without damaging.

Restore your countertops, bathrooms, tables, stairs, corners or any small or difficult to reach area.

Ideal for homes, hotels, institutions and professional stone care providers.

Easy to follow step by step instructions.

Kits to polish and renew marble, travertine and  
terrazzo

## Hand-held Kit

Use on corners and to remove superficial stains on smooth, small areas (marble or terrazzo).

## Drill Kit 75 mm (3in)

Ideal for smooth surfaces like countertops, stairs, etc. (marble or terrazzo).

## Drill Kit 125 mm (5in)

Ideal for stairs, countertops, or to fix small damaged areas in floors (marble or terrazzo).  
To polish walls, the area must be smooth, without lippage. Use with a slow-speed drill or hand polisher.

## Disc Set

100-125-150-165-180-200  
(4, 5, 6, 6.5, 7, 7.9 in)

Incredible micro polishing results. Get rid of stains and scratches that are not too deep. Use for stairs, walls, countertops, etc. Use with a slow speed drill or hand polisher.

## Quartz Kit 75-125 mm (3 or 5in)

For smooth, quartz surfaces, like countertops, etc. Contact us before using it.

# Bonastre Protect+

*Bonastre Protect+ is a “wet look” color enhancer, for mineral or plastic surfaces. Achieve an intense wet look that will enhance the surface color.*

*Interior and exterior use.*

Impregnator sealer and enhancer that provides water, oil and stain protection. Protect your surfaces from the elements that cause corrosion, like air pollution, dust, grease, etc.

Slows down the effects of corrosion, while facilitating its maintenance.

Directions:

Apply Bonastre Protect+ in a clean, dust-free area, using a paint roller.

Shake well before using.

Do not dilute or mix with any other product.

## Features

- » Protection against water, oil and stains.
- » Intense, wet look, that enhances the natural color.
- » Slows down the effects of corrosion and facilitates the surface maintenance.
- » Interior y exterior use.
- » Use on surfaces from high to low levels of porosity: natural stone (travertine, Baviera, stone, piedra caliza azul, marble...) or man made, concrete, terracotta, etc.
- » Ideal for garages, porches, pedestrian areas, pool surrounds, facades, stairs, and more.
- » 10 to 20 m<sup>2</sup> /liter (400 to 800 sq.ft per gallon)\*.

Test on an inconspicuous area first.

**Step 1:** Apply a thin layer, and remove the excess product. Make sure it penetrates the surface, without applying too much pressure.

**Paso 2:** Wait 10 minutes and remove the excess product. Dry and polish the area using a microfiber towel or a white pad.

In large areas, work in sections to allow the area to dry completely before stepping on it. If necessary, apply another layer to even the wet look.

Minimum curing: 24 hours.

Fully cured: 7 days.

# Bonastre Stone Soap

*Slightly acid and oily detergent, that reacts with calcareous surfaces, closing its pores, creating a barrier against water. It facilitates the cleaning process of the calcium residues after polishing. Use it daily to clean and seal calcareous surfaces, leaving a shiny and waterproof surface. Ideal to use after polishing.*

Apply a **very small amount of Stone Soap on the last polishing step (Duo pad or green pad)** to help remove residues, and making the area look shinier. Stone Soap reacts in a natural way creating a water resistant barrier.

## GRANITE POLISHING COMPOUND NOVAGRANIT GEL

Polishing compound for granite, quartz and porcelain surfaces. It creates a hard topical film that protects and adds reflectivity to the surface.

**With Novagranit Gel your high-traffic area will have a high-gloss finish, over a longer period of time.**

Novagranit Gel must be used with Bonastre's Novagranit Gel Pad. Available in any size.

VIDEO

## CRISTALLIZER B-ONE (USE WITH A WHITE PAD)

B-ONE is a white pad crystallizer that hardens the surface making it more resistant to wear due to traffic, while improving reflectivity, shine and depth in color on a mechanically polished surface. Anti-sleepery finish.

Following Bonastre's **eco-friendly philosophy, we had replaced magnesium fluosilicate and oxalic acid with citric acid.**

It can also be used for shine maintenance with Bonastre Duo or a Green Pad, with high speed burnishers or orbital machines.

In some cases, due to the friction that the white pad creates, it can overheat motors on swing machines, so an orbital machine or high speed burnisher can be used, making the job easier and with less effort.

**Odorless, fast and easy B-ONE application, using a white pad.**

Using B-ONE will not make a surface slippery. It's a great solution to maintain polished surfaces, renewing the gloss with a fast and easy process. It increases the surface scratch resistance, while reducing the frequency the need to repolish.

### Features

- » Use with a white pad.
- » Highest shine and reflectivity.
- » Won't stain or change the color of the stone.
- » Increases the shine durability.
- » Ready to use compound, won't produce orange peel effect.
- » Easy and fast process.
- » Odorless.
- » Increased scratch/wear resistance.
- » Slipery resistance shine.
- » Easy to use with an orbital machine.

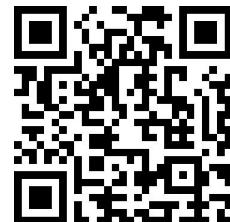

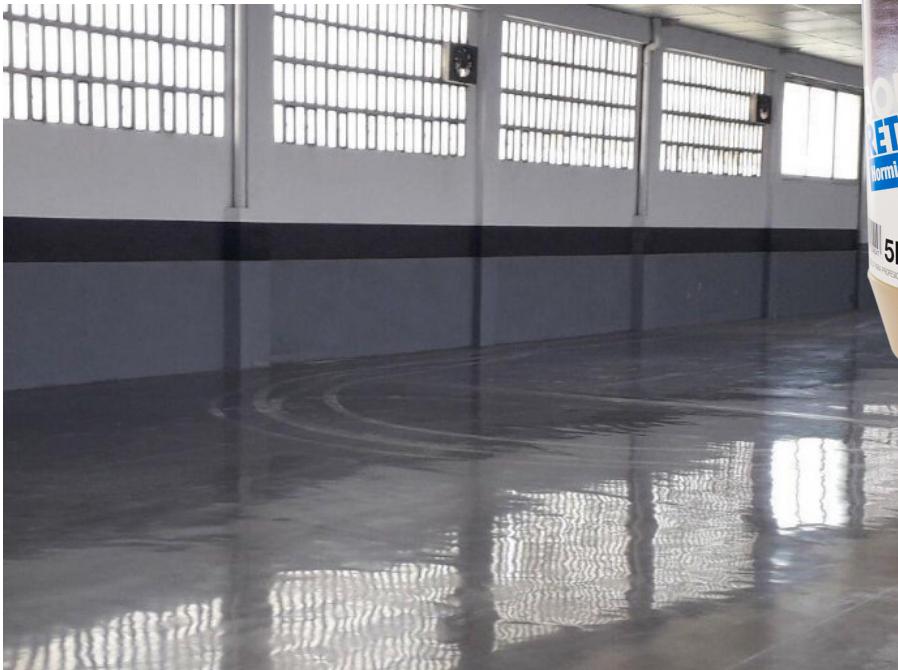

### DIRECTIONS

1. Clean and prepare your surface.
2. Don't use B-ONE on wet areas, make sure the surface is completely dry.
3. Light spray B-ONE crystallizer in a 3 to 6 sq ft, making sure the equipment is always in motion side to side, to avoid too much friction. If using an orbital equipment, too much friction won't be an issue.
4. Repeat the process as many times as needed. There's no risk of damaging the high-gloss finish.

# RETROPLATE

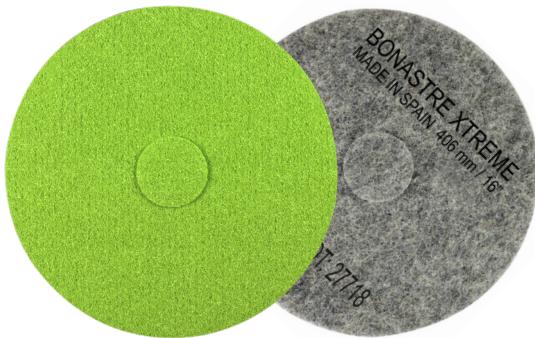

## ANTI-DUST PERMANENT TREATMENT

Concrete is a soft and porous material. It deteriorates and gets stained easily. The erosion, caused by friction, generates dust. To solve this problem, Bonastre recommends to hardener the surface with Retroplate.

Retroplate its a water & sodium based product that hardens the concrete surface, through a crystallizer process, that also reduces its porosity. It reduces the wear damage in more than 400%\*. The most importante feature of Retroplate, is that the concrete won't generate dust caused by wear.

You can achieve a high gloss finish when using Bonastre pads or Bonastre Pro system with Retroplate on your concrete surface, while keeping your surface cleaner. In addition, using Bonastre Protect+, color enhancer & sealer, will provide an extra layer of protection to your surface. Contact us!

To maintain your concrete surface, use [Bonastre Duo Xtreme](#) or [Green Xtreme](#) pad, if a high-gloss is required.

**Retroplate's coverage\*: 1 liter (1 quart)/10 meter (107 sq.ft.)**
