SAND BLASTING

PLASTICS

✓ Vacuum Silos designed to suction large quantities of material and discharge directly into big-bag or collection barrels.

✓ Filtering Silos connected to a powerful CVAC unit, designed to suction large quantities of material and discharge directly into big-bag or collection barrels.

FILTER UNIT

Filter Type		Cartridge
Surface - Diameter	cm ² -mm	106.000 - 150
Material - Efficiency	IEC 60335-2-69	Polyester - M
Cleaning system		Automatic PN

COLLECTION UNIT

Discharge system		Butterfly valve
Capacity	lt.	1000

VOLUME

Dimensions	cm	14x108x390h
Weight	kg	440

FILTER UNIT

The cartridges are automatically cleaned thanks to an alternating, pneumatic counter-cleaning system with a settable timer.

COLLECTION UNIT

The material is discharged directly into big-bags.

OPTIONALS

- ✓ PTFE coated class M filter
